## **Mode of Communication**

Joe is non-verbal. He communicates primarily through pointing or showing what he needs/wants. He is working on use of a communication board with pictures. He will laugh and clap his hands when he is happy or enjoying the activity. He cries and/or moans as an indicator that he is sick, in pain, or uncomfortable. He will smack his lips when he is hungry.

## **Instructional Adaptations**

All instructional materials must be read aloud to him. An assistant is required for participation in most instructional activities. Joe is included in the general classroom for reading and math. All worksheets and activities must be revised for his skill level. Worksheets are made up primarily of pictures with limited choices to allow for pointing. He has limited fine motor skills, but can use a switch.

## PORTFOLIO VALIDATION

*We, the undersigned, participated actively in either the planning, monitoring or evaluation of the instructional programming designed to meet the specified standards of the TCAP-Alt.*
